

Granulated Rubber Puzzle Flooring – 980×980 mm

The **granulated rubber puzzle flooring** tiles are manufactured using **recycled tire granules, polymer resin, and pigments**. Produced in interlocking puzzle shapes, these tiles come in **980 × 980 mm dimensions** with **20 mm and 25 mm thickness options**. Thanks to their **elastic and shock-absorbing structure**, they are an **ideal and safe choice** for **children's playgrounds, parks, gyms, and sports facilities**.

Feature	Specification
Dimensions	980 × 980 mm
Thickness	20 mm and 25 mm
Composition	Recycled rubber granules + polymer resin + pigments
Impact Resistance	Very high (shock absorption and injury reduction)
Abrasion Resistance	High (durability in heavy-use environments)
Flexibility	Excellent – prevents cracking
Water Absorption	Less than 3%
Colors	Available in multiple colors (Grey, Red, Green, Black, etc.)
Model	Granulated Puzzle Flooring
Applications	Children's playgrounds, gyms, sports halls, Parks, landscaping, and public spaces

Advantages

- Made from **recycled tires** (eco-friendly and sustainable)
- **Shock-absorbing** and safe for children
- **Durable and resistant** to wear and tear
- **Flexible**, preventing cracks and surface damage
- **Anti-slip surface** for safer use
- **Available in various colors**
