

Granulated Rubber Street Curb – 50x50x15 cm

The **granulated rubber street curbs** are manufactured using **recycled tire granules, polymer resin, and pigments**. This innovative product replaces traditional concrete curbs. By eliminating cement, it provides **higher flexibility, lighter weight, excellent resistance to impact and abrasion**, and represents an **eco-friendly and sustainable solution** for modern urban landscaping projects.

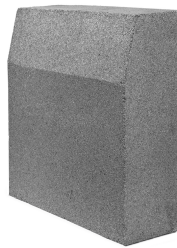

Feature	Specification
Dimensions	50 x 50 x 15 cm
Composition	Recycled rubber granules + polymer resin + pigments
Weight	Approx. 28–30 kg per unit
Compressive Strength	High – suitable for roadside and urban landscaping
Impact Resistance	Excellent – absorbs shocks, crack resistant
Abrasion Resistance	High durability – long service life
Water Absorption	Less than 3%
Colors	Grey, Red, Green, Black, and others
Model	Urban street curb
Applications	Roadside curbs, parking areas, pedestrian zones, Parks and urban landscaping

Advantages

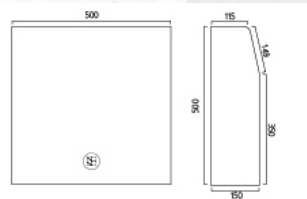

- Made from **recycled tires** (sustainable and eco-friendly)
- **Flexible and lighter** than traditional concrete curbs
- **Durable and resistant** to pressure, impact, and abrasion
- **Crack-resistant** even under ground settlement
- **Available in multiple colors and designs**
- **Eco-friendly** solution for modern cities
